CORPORATE CYBERSECURITY AWARENESS

Familiarize Yourself with Phishing Attacks

Targeted Training for HR and Marketing

HR

75% simulation failure rate

MARKETING

38% simulation failure rate

Strengthening our first line of defence starts with awareness.

What Is Phishing?

Phishing is a cyberattack in which criminals impersonate trusted people or organizations to trick employees into sharing sensitive information, clicking malicious links, or opening harmful attachments.

THE PSYCHOLOGY BEHIND IT

URGENCY

Creates time pressure to trigger immediate action.

FEAR

Threatens account suspension, financial loss, or consequences.

AUTHORITY

Impersonates executives, managers, or trusted partners.

WHY HR AND MARKETING ARE TARGETED

HR

Employee records, personal data, payroll information, and recruitment documents.

MARKETING

Customer databases, social media accounts, advertising platforms, and campaign analytics.

Attackers exploit access, trust, and routine business activities.

Learn to Spot Phishing Emails

FOUR WARNING SIGNS

01 SPOOFED SENDER

Look for misleading domains or addresses that imitate legitimate contacts.

02 SUSPICIOUS LINKS

Displayed text may hide a destination on an unfamiliar or fraudulent site.

03 UNEXPECTED FILES

Be cautious with unsolicited CVs, reports, invoices, or business documents.

04 URGENT LANGUAGE

Pressure, secrecy, or threats are designed to bypass careful judgment.

ROLE-BASED EXAMPLES

HR | FAKE RECRUITMENT EMAIL

Subject: Urgent: Senior Candidate CV – Immediate Review Required

An unfamiliar sender submits an unexpected CV attachment and pressures the recipient to open it immediately.

RED FLAGS: Unknown sender • Unexpected attachment • Artificial urgency

MARKETING | FAKE ANALYTICS REPORT

Subject: Action Required: Monthly Campaign Performance Report

An email impersonating an analytics platform directs employees to an external link to view a report or sign in.

RED FLAGS: Suspicious URL • Unexpected login request • Brand impersonation

Inspect the sender, destination, attachment, and context before taking action.

How Do We Stop Getting Phished?

MAKE P.V.R. YOUR DEFAULT RESPONSE

P PAUSE

- Do not rush into unexpected requests.
- Avoid clicking suspicious links or opening unexpected files.
- Question unusual requests—even from familiar names.

V VERIFY

- Check the sender's full email address.
- Confirm unusual requests through a separate, trusted channel.
- Use official websites or saved bookmarks to access platforms.

R REPORT

- Use the company's approved phishing-reporting procedure.
- Do not forward suspicious attachments or interact with links.
- If you clicked or opened something, notify IT/Security immediately.

BECOME A HUMAN FIREWALL

Every employee helps protect company systems and sensitive information. Recognizing and reporting suspicious activity can prevent security incidents. Cybersecurity is a shared responsibility.

THINK BEFORE YOU CLICK. VERIFY BEFORE YOU TRUST. REPORT SUSPICIOUS EMAILS.
